

# Solomon's Gardens Citrus – 2026

**Most citrus is only hardy to about 28 degrees.** This means that a winter frost will kill your precious bushes and trees. We suggest keeping your citrus plants in a pot so that it can be brought inside (or at least moved under a porch or overhang) in winter. Another option is to cover your plant completely with frost fabric or plastic before and during cold snaps. You could also try hanging big-bulbed Christmas lights (the kind that give off a little bit of heat) on it to prevent frost from damaging the plant.

Variety	SF? (self-fertile)	# Available	Growth	Price
<b>Kumquat</b> – Nagami (5-gal)	✓	1	Semi-Dwarf	\$59.95
<b>Lemon</b> – Eureka (5-gal)	✓	2	Semi-Dwarf	\$59.95
<b>Lemon</b> – Meyer Improved (5-gal)	✓	10	Semi-Dwarf	\$59.95
<b>Lime</b> – Bearss (5-gal)	✓	4	Semi-Dwarf	\$59.95
<b>Lime</b> – Bears (15-gal)	✓	1	Semi-Dwarf	\$159.95
<b>Orange</b> – Cara Cara (5-gal)	✓	1	Semi-Dwarf	\$59.95
<b>Orange</b> – Washington Navel (5-gal)	✓	1	Semi-Dwarf	\$59.95

Availability count: 3/10/26
