

# Privacy, please!

(evergreen screening)

If you are looking to block out neighbors or a busy street, evergreen shrubs and trees can get the job done. Here at the nursery, one of the most common questions we get is "what can I plant for screening?". For this reason, [we made a list of evergreen shrubs and trees](#) that make good privacy screens and do well in our area. They are listed in height order (of how tall they are at maturity) from shortest to tallest. Whether you need something 6 feet tall or 100 feet tall, this list should help you get started. On the list you will also find information on growth speed, deer-resistance, and other defining characteristics. We also included pictures of each plant starting on the third page of the list. For any questions about plants (those listed and not listed here), feel free to [contact us](#) or come by the nursery. We can try to assist you in deciding which plants will work best for you, let you know what is in stock, and give you the current prices. We hope this helps you get the privacy you are looking for!

**Go to <https://www.solomonsgardens.net/quiz> and click 'Privacy' on the second question to be matched with privacy screening plant options.**
