

Mosquitoes may be an important part of the food chain, but you don't want them buzzing around your yard, biting you and your family every time you go outside. To help keep mosquitoes away from your favorite summer hangout spots, try adding plants that repel them naturally. Here are a few that you can try planting or leaving in pots around your property: Monarda (Bee Balm), Catnip (Nepeta), Thuja (cedar trees), Lavender, Marigolds, Society Garlic, and Rosemary.

These are available at our nursery, but there are other plants out there that can repel mosquitoes as well. [Click here to see the list!](#)
